

The **Go Natural Water Distiller**

Today Water Pollution is a Reality
The Solution = **DISTILLATION**

Pure **Water** is the **Foundation of Health**

$\pm 70\%$ of your body

Functions of Pure Water in the Body

- ① Transports nutrients
- ② Regulates body temperature
- ③ Flushes toxins
- ④ Removes waste
- ⑤ Lubricates joints
- ⑥ Essential for all cellular functions
- ⑦ Cushions bones & joints
- ⑧ Improves intercellular communication
- ⑨ Empowers natural healing

for Healthy Living

The Go Natural Distiller effectively removes

Chemical Toxins

e.g. pesticides,
herbicides and
industrial waste

Inorganic Minerals

e.g. mercury, lead,
arsenic, aluminium
and other
dissolved solids

Biological Organisms

e.g. bacteria,
parasites and
viruses

Volatile Organic Compounds

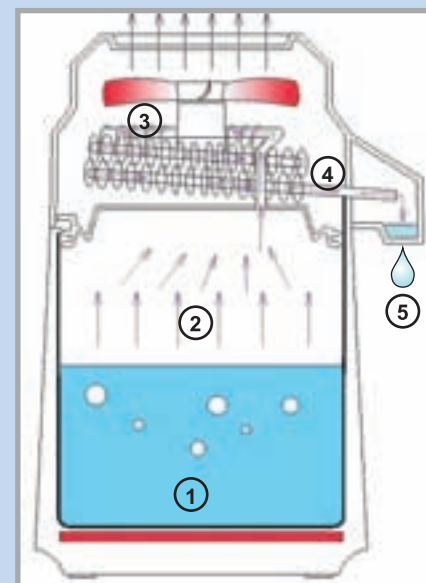

e.g. chlorine,
benzene, solvents
and petrochemicals

Go Natural distilled water is like rain water in an unpolluted atmosphere, intercepted at the point of condensation and brought directly to you.

The Process of Steam Distillation

1. In the boiler, tap water is boiled and steam is generated, killing all biological organisms such as bacteria, viruses and parasites that may be present.
2. Steam rises, leaving behind water contaminants such as:
 - chemical toxins;
 - inorganic minerals; and
 - dead biological organisms.
3. Low boiling light gasses are discharged through the gaseous vent.
4. Steam is condensed in the stainless steel coil condenser.
5. Purified water then percolates through a post carbon filter, enhancing the water quality by adsorption of volatile organic compounds and/or odours.
6. The 100% steam-distilled water is collected in the 4-litre glass collector bottle.

The distillation process is always 100% effective, with no dirt build-up or clogging of filters.

Product Features

USER-FRIENDLY: With no assembly or installation, this distiller is straightforward to operate.

EFFICIENT: Peace of mind, knowing it is effective all the time.

SEMI-AUTOMATIC: Using the auto shut-off, the Go Natural Distiller produces 4 litres of distilled water in your absence.

DURABLE: The stainless steel boiler and condenser guarantee the Go Natural Distiller's durability.

GLASS COLLECTOR BOTTLE.

PORTABLE: Packaging makes travelling without damaging the distiller possible.

LIGHTWEIGHT & COMPACT: This lightweight and user-friendly design is easy to transport.

VENT SYSTEM: For the removal of volatile organic compounds.

CARBON POST FILTER: Maximises purity and ensures there are no odours in the water.

Specifications

Distilling capacity	± 4 litres in 5½ hours
Full capacity	± 16 litres per day
Power consumption	580W
Power source	220-240V/50Hz
Weight	4,5 kg nett; 6,1 kg packaging inclusive
Outer dimensions	20 cm (diameter) x 36 cm (height)
Packaging dimensions	29 x 30 x 43 cm
Fuse melting temperature	157 °C
Guarantee	1 year

Package includes:

1. 1 x Distiller
2. 1 x Glass collector bottle
3. 6 x Activated charcoal sachets
4. 1 x Power cord with a 3-point plug
5. 1 x Residue cleaner
